

The Model "PDS-36" is an exhaust, intake or poly-tube ventilation fan unit. Ideally suited for use in all **INDUSTRIAL AND AGRICULTURAL FACILITIES.**

Features

- 36" direct drive fan requiring no belts, no bearings to grease with high efficiency with no drive loss.
- One piece housing is made of polyethylene for a totally corrosion resistant fan.
- Galvanized steel motor mount and fan blade, with a plastic blade option.
- Totally enclosed heavy duty motor with ball bearings and overload protection.
- Interior flush mount design, reducing installation time and eliminates obstructions on walls or alleyways.
- Can be used for exhaust, intake or poly-tube ventilation.
- Shutter mounts easily to inside of building – allows for easy cleaning and reduced noise.
